

## Focaia Flooring

"Focaia" stone flooring is a multitude of shades of colour and forms of fossilization which render it unique and without rival. Once laid it transforms the floor into a work of art, an abstract painting created by the slabs themselves. Slabs of this stone are limited in number, making it particularly rare and precious, suitable for converted lofts and refined interiors which seek to impress.

### DESCRIPTION:

Hard limestone FOCAIA.

### TYPE:

Slabs 4/6 cm. and 8/10 cm. thick.

### PEZZATURA:

Medium-large:
