

# ECO 401

## Mosaic Slabs

VERA PIETRA NATURALE

The Eco 401 "opus incertum" or mosaic stone paving slabs are both innovative and of high design; at the same time, though, they evoke the magic of old-world and inimitable atmospheres. They lend themselves to customizing both internal and outside areas and their versatility means that any type of space can be shaped and transformed. Uniform thickness and the trimmed support base mean rapid installation with either adhesive or mortar with excellent results guaranteed every time. The hard-wearing attributes and the white pearly color make ECO 401 mosaic slabs one of the most popular products for creating pavements, courtyards and drives.

### DESCRIPTION:

Hard limestone.  
Lab trials carried out by the  
Ufficio di Geologia di  
Bolzano

### STONES BY NAME:
