Split blocks and slabs

VERA PIETRA NATURALE

A special selection comprising a range of different stones to embellish walls, lending light, colour and depth. A combination of split blocks and natural and crafted Paglierino slabs are used to create this effect.

The stones can be laid quickly and simply and the infinite combinations of shades and tonalities which can be obtained by mixing the stones make this a valuable technique for all architectural and stylistic projects.

Cost (Mq.)

DESCRIPTION:

Hard limestone, Perlato, Paglierino.

TYPE:

Split blocks

Block height cm 10-15-20-25

"perlato" blocks with split face
